PROFILE

Full-stack developer focused on Next.js, TypeScript, and PostgreSQL, with a foundation in computer networking. Builds web products end to end and connects frontend work with APIs, data, and infrastructure.

TECHNICAL SKILLS

Programming
TypeScript, JavaScript, Python, C#, Go

Web
Next.js, React, Django, Django REST Framework, React Native

Data and APIs
PostgreSQL, MySQL, SQLite, REST APIs, WebRTC

Infrastructure
Linux, Git, GitHub Actions, Docker, Kubernetes, Nginx

Networking
TCP/IP, Cisco, MikroTik, Packet Tracer, GNS3, EVE-NG

EDUCATION

MSc Software Engineering
Currently studying
2026 - Present

BSc Computer Networking
Shamsipour Technical College
2024 - 2026

Associate - Computer Networks
Shamsipour Technical College
2022 - 2024

High School Diploma
Resalat Technical Vocational School
2020 - 2022

CURRENT LEARNING

Production engineering, secure APIs, observability, and a learning path toward practical machine learning and model training.

SELECTED PROJECTS

Iran AIP Explorer

Next.js | TypeScript | React

Searchable Iranian airport AIP chart explorer with favorites for frequently used references.

StockDevice

Django REST Framework | React Native | Python

E-commerce project connecting a Django REST API with a React Native client.

Meeting Platform

React | TypeScript | Go | WebRTC

Browser-based real-time meeting experience connecting a React interface and Go backend.

Cisco Sentinel

Python | Cisco | Monitoring

Cisco device dashboard presenting CPU, memory, and traffic through dynamic visualizations.
